Peñafrancia Ave, Naga City, Camarines Sur | vincentdolera25@gmail.com | 09682916748

SUMMARY

Motivated 4th-year Information Technology student at Ateneo de Naga University with professional internship experience. Passionate about Fullstack Web and Mobile Development, with hands-on expertise in the MERN stack, Next.js, and Expo. Proficient in AI-driven development, using prompt engineering to speed up coding workflows, debug efficiently, and optimize logic. Adept at combining AI tools with modern frameworks and eager to continue building scalable, user-centric applications and expanding my technical skill set.

EXPERIENCE

Bald Puppies Solutions Inc.

UI/UX & Fullstack Web/Mobile Developer Intern | January 2026 – April 2026

- Completed 486 hours of internship, developing and styling responsive frontend interfaces for web applications using React, Next.js, and CSS.
- Built mobile applications using Expo and React Native. Transforming Figma UI designs into functional components.
- Integrated backend services and APIs using Supabase and JWT, implementing secure user authentication, role management, and database connections.
- Utilized AI tools to accelerate development processes, troubleshoot code, and enhance overall productivity.

AI Training Presenter

Resource Speaker | Parochial School | February 2026

- Conducted an AI training seminar for school teachers, educating them on the practical applications and integration of artificial intelligence tools in their workflows.

Resource Speaker | FJC RAELES FOOD SERVICE | March 2026

- Served as a resource speaker on Artificial Intelligence, presenting on its practical applications and utility.

EDUCATION

High School :

La Consolacion College of Daet

2014 - 2019

College :

Bachelor of Science in Information Technology
Ateneo de Naga University

2022 – Present

PROJECTS

- **SPARTA (MERN Stack):** Sports management web app with automated bracketing and live scoring.
- **IMSU (MERN Stack):** Event and team management portal for university intramurals.
- **ADNU-ECO (Django, HTML/CSS):** Community e-commerce platform for student entrepreneurship.
- **YUMHUNT (Flutter, Dart):** Mobile application for campus local food discovery.
- **Chargeeee!!! (C):** 2-player text turn-based strategy game.
- **Weather App (React and Express):** Real-time weather forecasting and location tracking website.
- **Cat Game (HTML, CSS, JS):** A pixel game like pokemon but with Random Cats(png).

SKILLS

AI Skills: Prompt Engineering, AI-Assisted Development

Frontend: React.js, Next.js, Expo, React Native, Flutter, Dart, HTML, CSS, Figma (UI/UX)

Backend: Node.js, Express.js, Supabase, SQL, MongoDB, Django, JWT

Programming Languages: JavaScript, Java, C, C++
